

Nationwide Criminal SuperSearch

The Nationwide Criminal SuperSearch is a product that automatically performs a multi-state criminal search covering many states across the nation, ***instantly***. Records included in this search vary by state, and can include statewide convictions, arrests, court records, and inmate records from an array of sources including County Clerk of Court records county courts as well as statewide sources such as the Department of Corrections.

Records are continually expanding and building this national database on a daily basis.

The Criminal SuperSearch is recommended in a variety of circumstances, particularly when an applicant's Social Security Number indicates residence in several states and it is more cost effective to run the SuperSearch as opposed to a statewide or single county search in each state of residence.

The following states have sufficient levels of criminal data to consider the Criminal SuperSearch an adequate data source without further investigation at a county/statewide level:

- | | |
|------------------|-------------------|
| 1 Alaska | 11 Oregon |
| 2 Arizona | 12 Pennsylvania |
| 3 Connecticut | 13 South Carolina |
| 4 Hawaii | 14 Texas |
| 5 Maryland | 15 Washington |
| 6 Missouri | 16 West Virginia |
| 7 North Carolina | 17 Wisconsin |
| 8 North Dakota | |
| 9 Ohio | |
| 10 Oklahoma | |

A coverage area template has been included on the following pages to further detail the type of information available from each state.

Note: The attached template includes some level of criminal coverage from 44 states nationwide; however, the level of coverage is not sufficient for this product to be the recommended search from Rental History Reports. If a record match is found in any of the states not included in the table above, you will still see the findings.

Results are returned within minutes via our website application.

Alabama:

Department of Corrections

Description: Data contains statewide records of persons who have been under the supervision of the AL DOC, generally dating back to 2004.
